A VISION OF GLOBAL REACH

For almost twenty years, the award winning wine cooler brand, Dunavox, has been associated with professional storage and cooling solutions for wine at home – Dunavox has been at the forefront of development and is known for minimalistic yet functional design character, practical internal layout, state-of-the art technology and energy efficiency.

As a result of recent further business expansion, Europe's largest range of over 50 different premium wine coolers is now available through it's network of global distributors but also five separate Dunavox subsidiaries – all providing high quality assistance, technical support and after-sales service.

PROFESSIONAL WINE STORAGE

OWN A WINE CELLAR AT HOME

Dunavox wine coolers are designed to mimic a wine cellar, the features that occur naturally in a wine cellar are all managed and maintained within a Dunavox wine cooler. There is a balance of light, temperature and humidity, where your wine collection can be stored in peace. Wine cellars are difficult to incorporate into existing houses and are generally found in the basement, this means that a Dunavox wine cooler is the perfect solution to store all your wines safely and for many years to come.

PERFECT GET-TOGETHER AT HOME

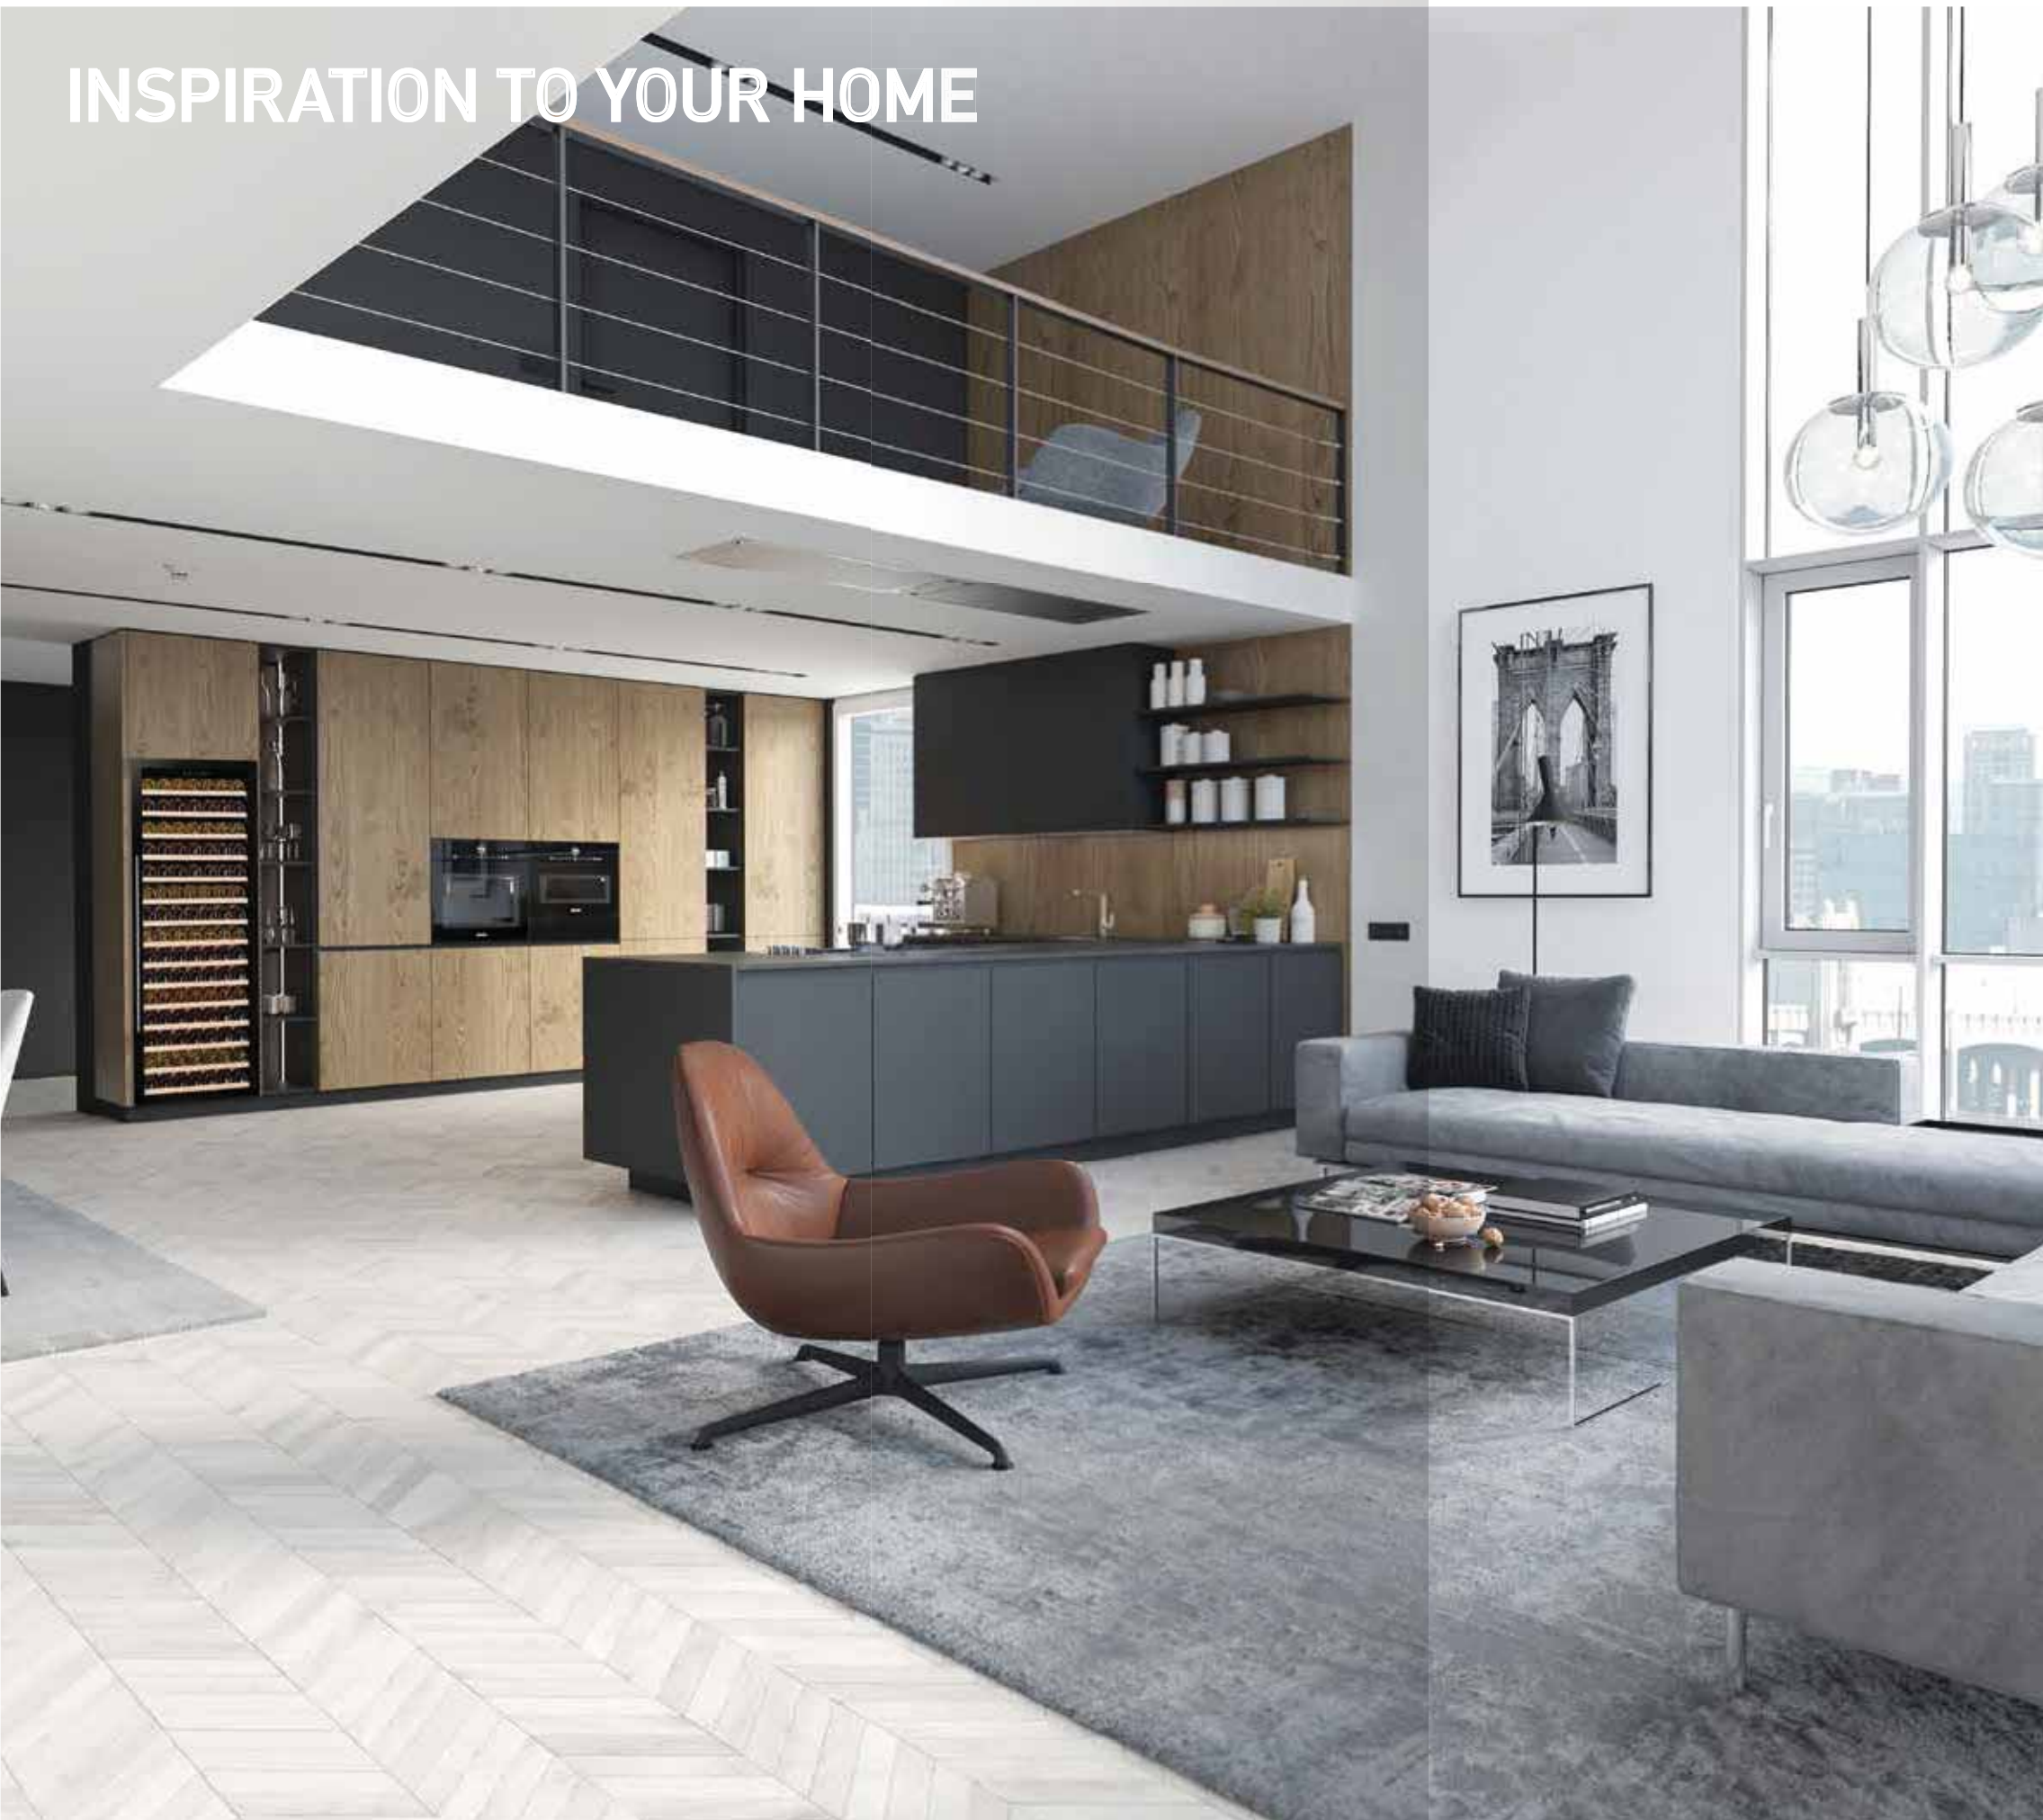

BE A WINE CONNOISSEUR

Entertaining at home and experimenting in the kitchen with special ingredients and complex recipes have become a lot more popular than ever before giving quality wine drinking more significance. And there surely is nothing better than sipping on a glass of wine that has been served in the correct glass and chilled to perfection and aged appropriately.

INSPIRATION TO YOUR HOME

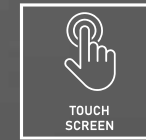

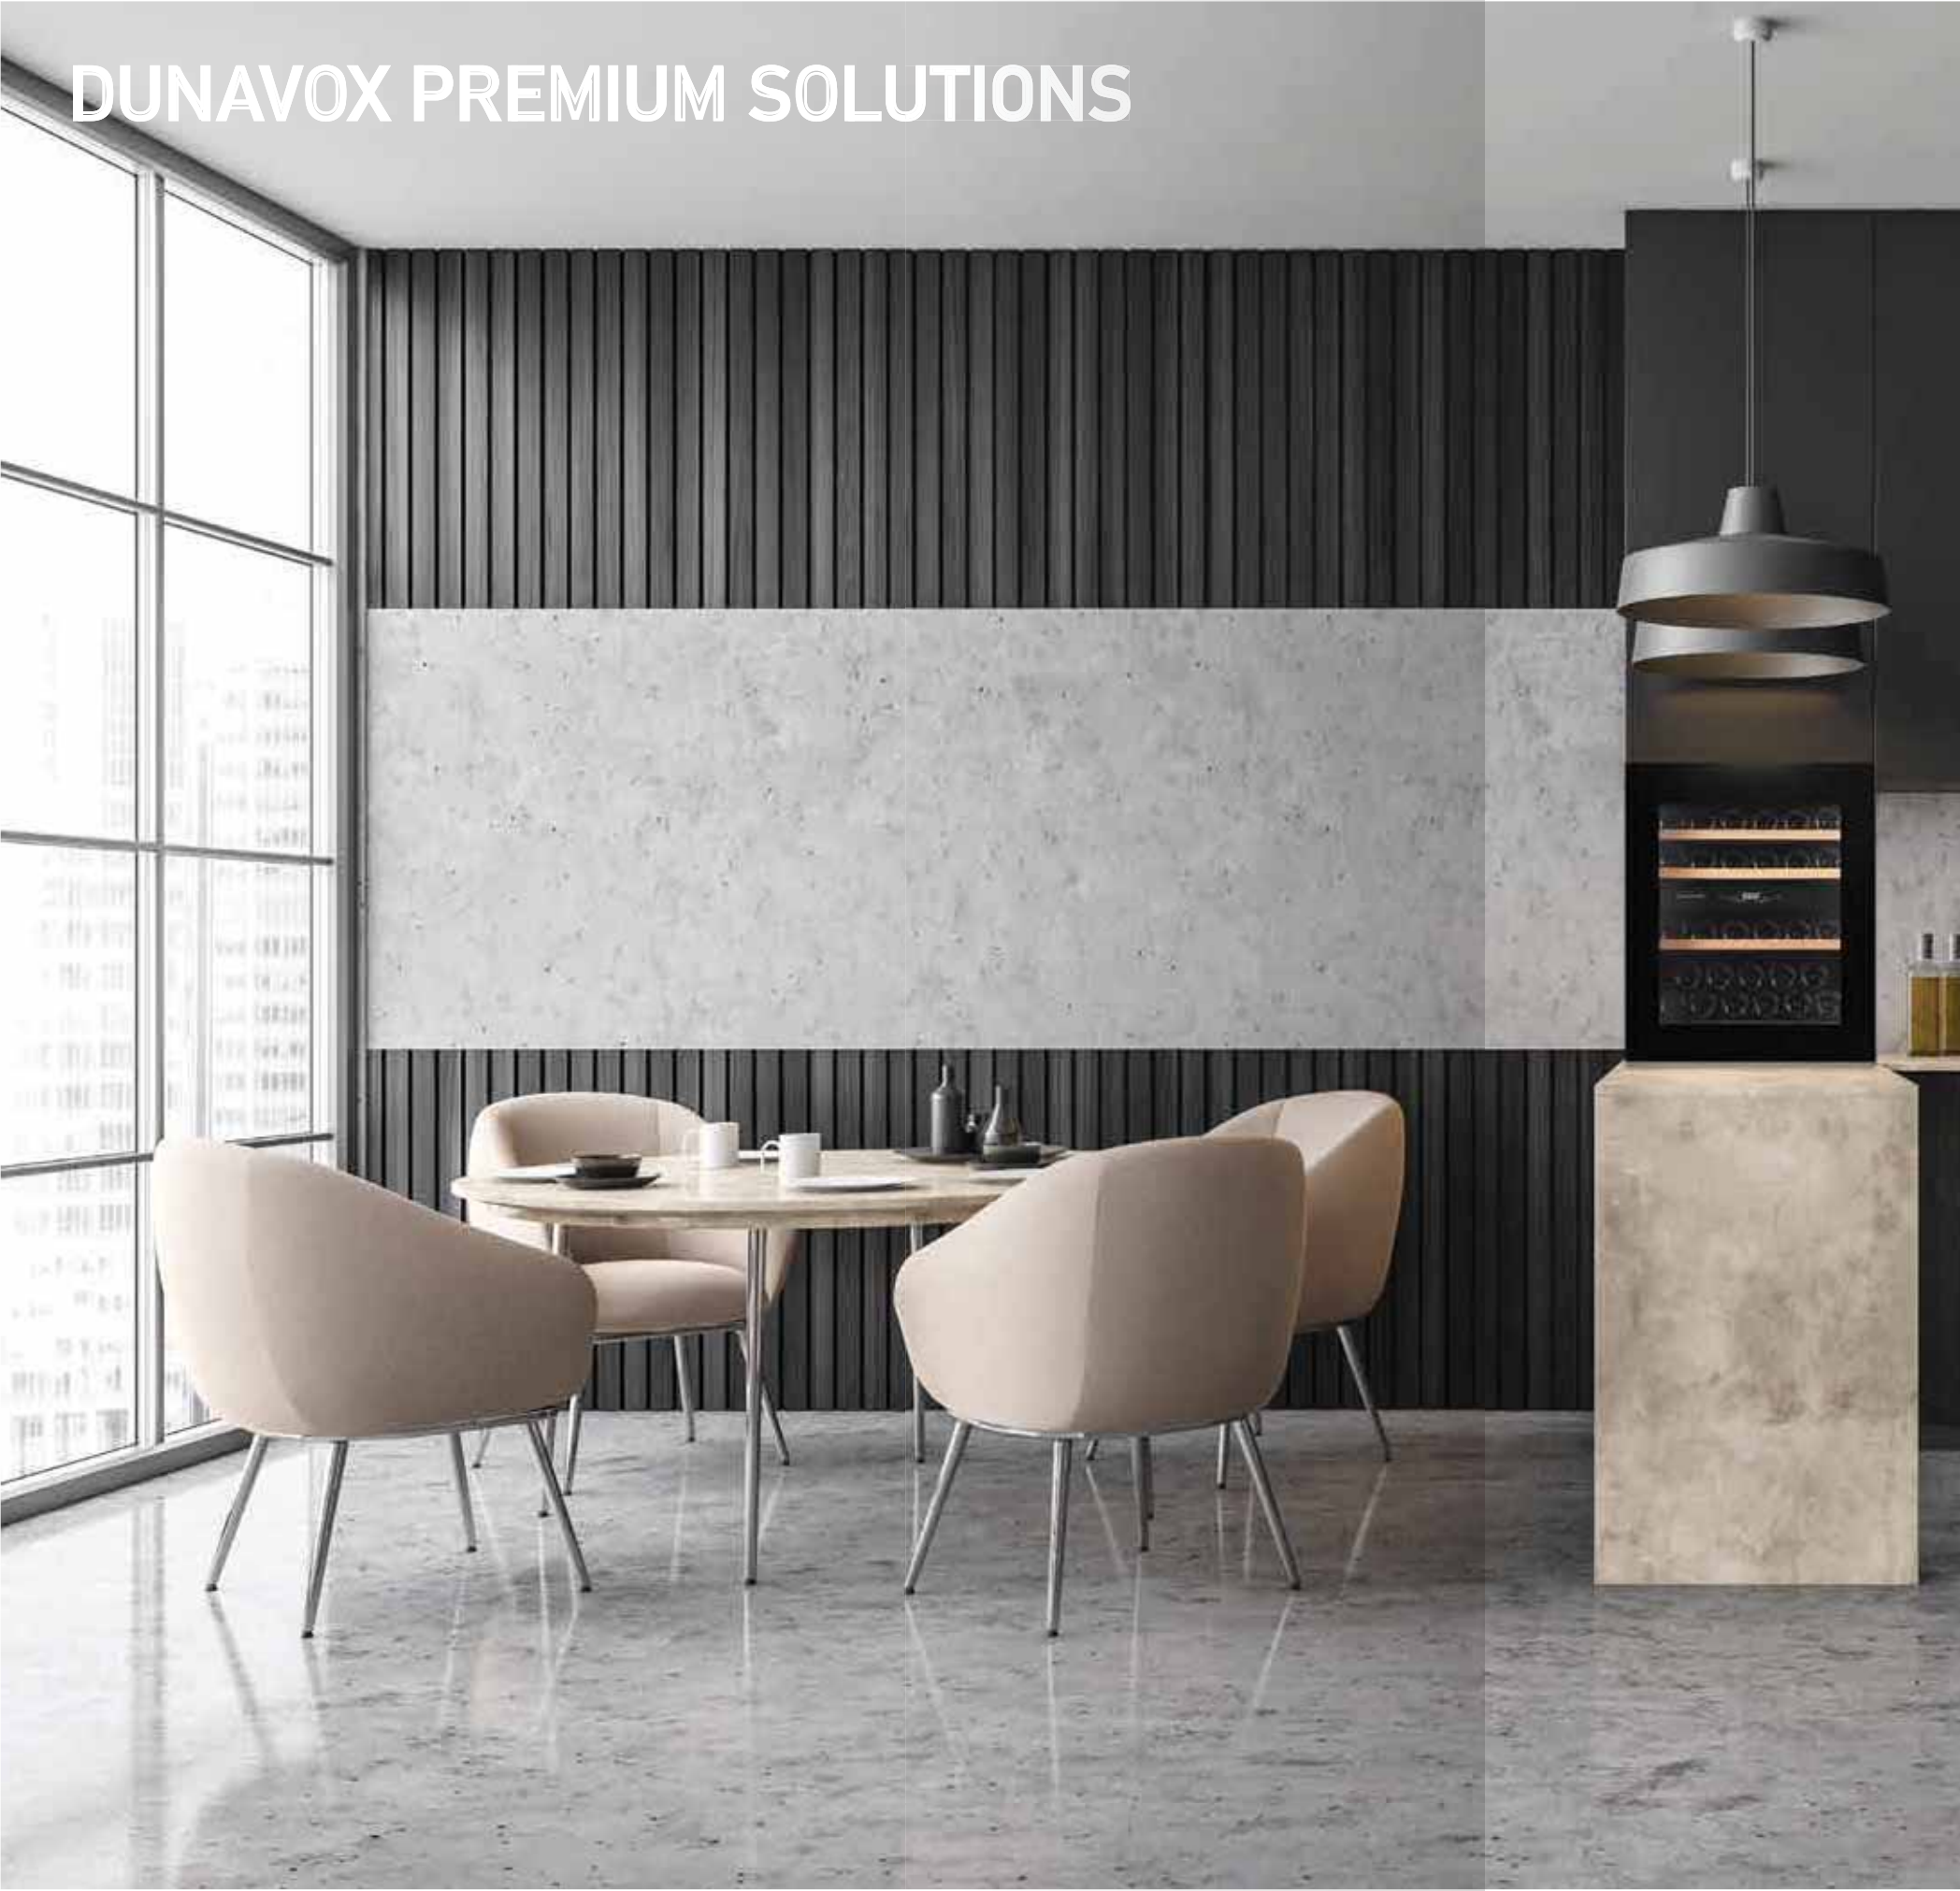

OWN A WINE CELLAR AT HOME

Ever been amazed how a wine cooler can create such a dynamic space, offering numerous possibilities in terms of design and finish? It is almost like painting on a canvas where you can give wings to your imagination. You surely don't want it look alien from the entire design of your home. Rather, the look and feel should be like it is an integral part of your interior designing scheme. One of the biggest advantages of having a wine cooler that it makes your interior luxurious and sophisticated at the same time. It takes the place of pride in the middle of the living area and creates an undeniable statement of luxury and class.

DUNAVOX PREMIUM SOLUTIONS

DISPLAY

The new Dunavox models feature either LED displays with touch controls or LCD displays with multicoloured internal lighting to ensure the wine cooler fits into any kitchen design.

EASY TO USE

The convenient and user-friendly touch button controls allow you to adjust the cooling zones with a simple action.

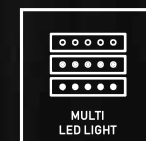

SINGLE, DUAL AND THREE TEMPERATURE ZONES

Dunavox wine coolers are available with one, two, or three cooling zones. The variety of the product range provides the possibility to store different kinds of wine at their ideal serving or storage temperature – making them versatile, quiet and reliable.

EASY TO USE

Configuring the desired temperature is easy at single, dual or even three cooling zone wine coolers.

MULTI LED LIGHT

Interior LED light colour which can set to white, amber and blue. This feature gives a freedom to set the perfect lighting option for the interior.

EASY TO USE

The convenient and user-friendly touch button controls allow you to adjust the colours with a simple change.

DUNAVOX PREMIUM SOLUTIONS

PUSH-TO-OPEN

With the new trend in handleless kitchens, Dunavox have developed wine coolers that feature push-to-open technology. The doors are handle-less, a gentle push to the top of the door is enough to activate the internal sensor which opens automatically – ensuring the appliance perfectly matches with all handleless kitchens in a modern design. All of the doors close automatically if the door isn't opened within a few seconds to ensure the temperature is maintained in the cooler.

EASY TO USE

Gentle push to the top of the door is enough, and the door opened. If we do not open it further closes by itself.

INTEGRATED VENTILATION

Our newest development is self-ventilating wine coolers. This makes the wine coolers extremely easy to install as the vents usually required to create the airflow are no longer needed. There is a ventilation grille at the bottom of the cooler which allows the cool air to reach the compressor, at the top there is another ventilation grill which allows the warm air to escape. This means that integrated units can now be installed underneath worktops making them extremely easy to incorporate into modern kitchens.

OVERLAY PANEL

Overlay panel door option allows you to hide the wine cooler completely with furniture. The same furniture panel can be attached to the winecooler as the kitchen furniture has been made of. Overlay panel door option allows to hide the winecooler completely in the interior. Only available for Glance series, except Glance-18.

INVESTING IN THE WORLD

REDUCE, REUSE, RECYCLE

Reduce Reuse Recycle is known to the environmentally conscious consumers by the term of 3R's calling for an increase in the ratio of recyclable materials, reuse of raw materials and manufacturing waste and overall reduction in resources and energy used. The concept of 3R's has become the governing part in every aspect of doing business by the entire Dunavox community and has been applied to the entire lifecycles of products and services.

In order to reduce our environmental footprint, Dunavox is committed to produce and sell wine coolers of long-lasting lifetime shown by the unique 3-year warranty Dunavox wine coolers are supported by.

REDUCE

The most important way of reducing waste is by not creating waste in the first place. By reducing the usage of unwanted products, this will save our natural resources and decreases energy consumption. Dunavox's recent efforts to minimize the usage of unnecessary materials includes the use of less packaging materials, the introduction of e-manuals instead of paper-based documentation and the complete removal of any ozone harming gas from our wine coolers as well as aiming for 100% paper-free working environment at all Dunavox offices.

REUSE

We don't throw away any reusable material but try to reuse as much material as possible including cardboard packaging, protective material, pallets and other packaging substances. Broken or returned units are repaired and sold with substantial discount or donated instead of scrapping them. Unwanted office equipment is also donated to non-profitable organizations and charity.

RECYCLE

Cardboard used for packing our wine coolers contains at least 50% recycled paper and protective polyfoams are made of fully recycled polystyrene. Fans, power boards and displays are manufactured by recycled plastics. Dunavox aims for 100% recyclability in the use of all paper and polymer materials.

Dunavox ensures a separate collection of waste all along it's entire supply chain as well as in the offices.

ADVANCED TECHNOLOGY FOR REAL WINE EXPERIENCE

1 COOLING ZONE

Single temperature zone wine cooler. Ideal for cooling of a one type of wine.

2 COOLING ZONES

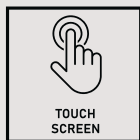

Dual temperature zones wine cooler. Ideal for cooling white/rosé and red wine.

3 COOLING ZONES

Three temperature zones wine cooler. Ideal for cooling all specific of wines.

TOUCH SCREEN

The display of the winecooler is touch screen controlled. Press the selected buttons for temperature setting or turning the light on or off.

PUSH TO OPEN

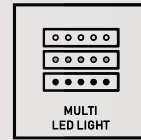

This unit is handle-less. Door opening performed by pushing the top left or right corner of the door.

HANDLE DOOR

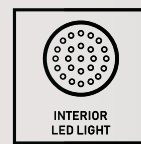

A handle is attached to the door, this allows to open and close the door of the wine cooler.

MULTI LED LIGHT

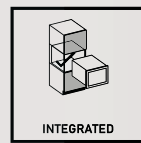

Interior LED light colour which can set to white, blue and amber.

INTERIOR LED LIGHT

The unit has an interior LED light which can be turned on or off.

INTEGRATED

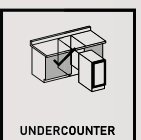

Built in/integrated units is only suitable for within kitchen cabinets. They require ventilation to the rear and there must be a grille installed in the plinth this is crucial as without it the wine coolers will not be able to cool properly.

FREE-STANDING

These coolers are not suitable for built in/integrated use and shouldn't be installed under a counter top they require free space around the sides and rear in order for the compressor to cool effectively.

UNDER-COUNTER

Undercounter units, as the name suggests, are designed to be installed under a counter top. Some of them are still suitable for freestanding use though.

FAN ASSISTED COOLING

Internal fans support the air circulation inside the unit. This ensures the set temperature and humidity are stable inside the wine cooler.

INTEGRATED VENTILATION

There are two ventilation grids and a special door on the unit. The grids and the door allows for enough air circulation around the unit without following the standard installation procedure which is required with integrated units – this makes installing them very easier.

UV LIGHT PROTECTION

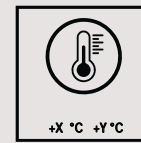

A special layer included on the door which reduces the harmful effects of UV lights. Direct sunlight is still harmful for the unit and the wines. Please consider this when installing the winecooler.

HUMIDITY CONTROL

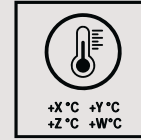

There is a plastic box on one of the shelves inside the unit. Filling it water allows to increase the inner humidity in the cabinet.

SINGLE ZONE TEMPERATURE

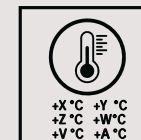

Cooling range can be set between X°C to Y°C.

DOUBLE ZONE TEMPERATURES

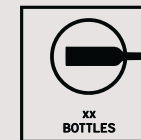

Cooling range can be set between X°C to Y°C in the upper zone, and Z°C to W°C in the lower zone.

THREE ZONE TEMPERATURES

Cooling range can be set between X°C to Y°C in the upper, Z°C to W°C in the middle, and V°C to A°C in the lower zone.

BOTTLE LOADING

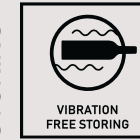

Bottle loading plan indicates how many regular bordeaux bottle fits into the wine cooler.

CHAMPAGNE & PROSECCO

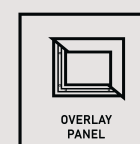

This unit is dedicated for champagne & prosecco cooling.

VIBRATION FREE STORING

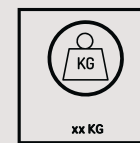

The compressor is the heart of every wine cooler. The compressor is fixed on 4 strong rubber bushes, to minimize the vibration during operation. The wine will not be affected by the regular compressor start/stop cycles.

OVERLAY PANEL

Overlay panel door option allows you to hide the wine cooler completely with furniture. The same furniture panel can be attached to the winecooler as the kitchen furniture has been made of.

WEIGHT (KGS)

Net weight of the unit. Packaging is not included.

VOLUME (LITRES)

Total volume of the inside cabinet.

NOISE (dB)

Average noise emission of the unit.

3 YEARS WARRANTY

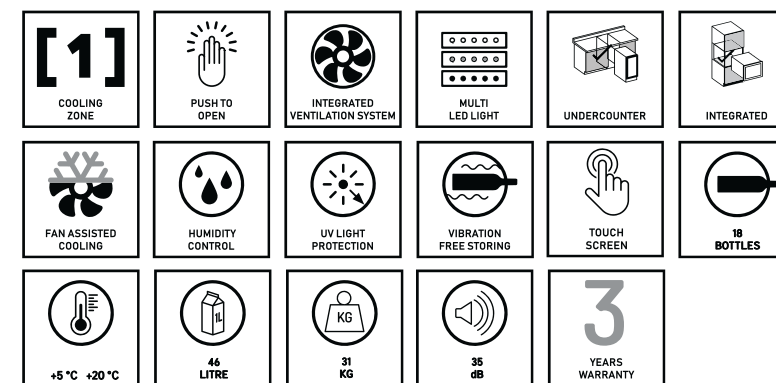

Dunavox provides a 3 years warranty on our products.

Dunavox Glance is our premium range, kitchen-integrated wine coolers that have been developed featuring push-to-open technology – a gentle push to the top of the door is enough to activate the internal sensor which opens automatically ensuring a perfect match with all handleless kitchens in a modern design. The integrated ventilation system allows the cool air to reach the compressor via a grille at the bottom and the warm air to escape through another grille at the top of the wine cooler. This means that the Dunavox Glance wine coolers can be installed underneath worktops and not just in tower unit, making them extremely easy to incorporate into modern kitchens.

**DUNAVOX
GLANCE**

DUNAVOX Glance-18

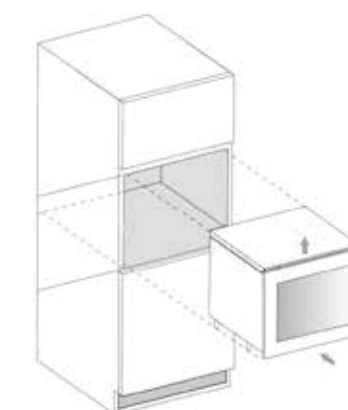

A single zone, 18 bottle integrated model featuring integrated ventilation. It's elegant appearance, handleless design with push2open technology is ideal for any modern kitchen.
